Website	ans.org.np

## POSITIONING

### Premier Nepali infrastructure contractor

The company delivers durable construction solutions that connect communities, increase access to public services, improve trade corridors, and support sustainable development.

#### Focus

Quality, safety, innovation, and timely execution.

#### Approach

Client coordination, field control, and accountable handover.

## LEADERSHIP MESSAGE

# Shaping a stronger, more sustainable Nepal.

As we proudly celebrate nearly four decades of excellence, Ashish Nirman Sewa Pvt. Ltd. continues to redefine the construction landscape of Nepal. With a proven track record of delivering over 100 major infrastructure projects, our expertise spans roads, bridges, hydropower, water supply and treatment plants, buildings, airports, and irrigation systems. As we move forward, we are expanding into new frontiers including construction materials and clean renewable energy. Our commitment to the highest engineering standards remains the foundation of our success.

**515+**

Core human resources listed in 2026 profile

**SERVICE  
PORTFOLIO**

ANS works across the full infrastructure stack, from highways and bridges to institutional buildings, irrigation, hydropower, airport infrastructure, water supply, sewerage, drainage, and equipment-led project planning.

**Integrated  
construction  
capability.**

**ROADS & BRIDGES**

Highway corridors, motorable bridges, river crossings, retaining structures, blacktop works, maintenance, and trade-route upgrades.

**BUILDINGS**

Hospitals, offices, convention centers, customs buildings, barracks, public facilities, and institutional campuses.

**WATER & SEWERAGE**

Water supply, sanitation, treatment plants, drainage networks, sewerage systems, river training, and protection works.

**HYDROPOWER & IRRIGATION**

Hydropower civil works, canals, headworks, transmission infrastructure, and water-resource systems.

**AIRPORT & TRANSPORT**

Airport terminal expansion, taxiway work, inland cargo facilities, bus terminals, and logistics infrastructure.

**PLANNING & EQUIPMENT**

Project planning supported by in-house plant, machinery, survey equipment, operators, mechanics, and logistics teams.

**PROJECT PROOF**

**Major works  
across strategic  
sectors.**

The portfolio combines current national-scale assignments with completed public works for government, donor-funded, municipal, institutional, aviation, utility, and private-sector clients.
